

What are Synonyms, Antonyms, and Homonyms?

Song # 9

What are synonyms? What are synonyms?
They are words that mean the same
They are words that mean the same

What are synonyms? What are synonyms?
They are words that mean the same
They are words that mean the same

Big...huge...gigantic...are synonyms...are synonyms
Pretty...gorgeous...and beautiful...are synonyms...are synonyms
Laugh...chuckle...and giggle...are synonyms...are synonyms

What are synonyms? What are synonyms?
They are words that mean the same
They are words that mean the same

What are antonyms? What are antonyms?
They are opposites They are opposites

What are antonyms? What are antonyms?
They are opposites. They are opposites.

Tall and short...are antonyms...are antonyms.
Good and bad...are antonyms...are antonyms.
Clean and dirty...are antonyms...are antonyms.

What are antonyms? What are antonyms?
They are opposites. They are opposites.

What are homonyms? What are homonyms?
They are words that sound the same but have different meanings.

What are homonyms? What are homonyms?
They are words that sound the same but have different meanings.

The eight that's a number and I ate my food
Are homonyms...are homonyms.

The road that's a street and I rode in the car

Are homonyms...are homonyms.

The meat that's a burger and I'll meet you at the game...

Are homonyms...are homonyms.

What are homonyms? What are homonyms?

They are words that sound the same but have different meanings.

What are homonyms? What are homonyms?

They are words that sound the same but have different meanings

Hey remember...synonyms are words that mean the same like

Wet...and damp...and soggy

And remember antonyms are opposite like

Top and bottom

And finally...homonyms are words that sound the same but have different meanings like

Hi to say hello and how high can you go
